Languages: SQL, CSS, HTML, Java, JavaScript, C, Python
Frameworks & Tools: Git, Node.js, React.js, Tkinter, Figma, Android Studio, Visual Studio Code
Collaboration & Productivity Tools: Google Workspace (Docs, Sheets, Slides, Forms, Drive, Classroom)

EXPERIENCE & ORGANIZATIONS

Compiler Development Project **Aug. 2025 - Present**
Full-Stack Developer

- Developed the front-end pipeline (lexer and parser) and implemented semantic analysis including type checking, scope resolution, and error detection to ensure syntactic and semantic correctness of source code

AIlab - AI Powered PLM Student Companion **Aug. 2025 - Dec. 2025**
UI-UX Designer

- Designed wireframes and interactive prototypes for an AI-driven student companion app, mapping user flows and interface layouts to deliver an intuitive and accessible experience for PLM students

PoyBash Furniture - E-Commerce & Inventory Management System **Aug. 2025 - Present**
UI-UX Designer and QA Analyst

- Designed the UI/UX and developed the front-end interface for a furniture e-commerce and inventory management system, creating intuitive product browsing, cart, and inventory dashboard experiences with a focus on clean, user-friendly design

Student Enrollment System **Mar. 2024 - Dec. 2024**
Full-Stack Developer

- Built a full-stack student enrollment system from the ground up, handling database design, backend logic, and frontend interface to support end-to-end student registration and records management

Google Developer Student Club **Nov. 2024 - Present**
Noogler

- Attended chapter events and tech sessions to expand knowledge in Google technologies, software development practices, and the developer community

PROJECTS

Personal Portfolio Website | HTML, CSS, JavaScript **February 2024**

- Built a personal portfolio website from scratch using HTML, CSS, and JavaScript to showcase projects, skills, and experience with a clean and responsive design

Memory Matching Game | HTML, CSS, JavaScript **April 2025**

- Developed a fully functional memory matching game with card flip animations, match detection logic, and score tracking, handling both front-end design and back-end game state management

Blimpz - Cloud-Based Trivia & Quiz Game | HTML, CSS, JavaScript **April 2025**

- Designed and implemented the front-end interface for Blimpz, focusing on responsive layouts, visual styling, and delivering a smooth and engaging user experience
